SUMMARY

Full Stack Developer with 1.8+ years of experience building and maintaining web applications with Next.js, Node.js, PostgreSQL, and Prisma. Currently the sole developer of three web applications at Mumbai Biocluster. Previous work includes data platforms for renewable energy forecasting and shipping software for e-commerce sellers. Maintainer of DevCompass, an open-source npm package.

SKILLS

Languages: JavaScript, TypeScript, Python

Frameworks and Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, shadcn/ui, Prisma ORM, NextAuth.js

Databases: PostgreSQL, MySQL, MongoDB, Redis, Supabase

Backend: REST APIs, JWT Authentication, Role-Based Access Control, BullMQ Job Queues, Cron Jobs, FTP/SFTP, Excel/XLSX Processing, Razorpay, AWS S3, Caching, Rate Limiting, API Security

Cloud and DevOps: AWS EC2, Bluehost VPS, DigitalOcean, Linux, Nginx, PM2, Docker, GitHub Actions

Testing and Tools: Jest, React Testing Library, Unit Testing, Postman, Git, GitHub

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | ICT Mumbai Research Foundation (Mumbai Biocluster) May 2026 - Present

- Build and maintain three Next.js and PostgreSQL applications as the sole developer: IndiaPharmaHub, Yantra, and an internal HR management system
- IndiaPharmaHub: a B2B marketplace for pharma and life-sciences sellers and buyers, with GST/PAN verification, product and service catalogs, quotations, chat, and Razorpay subscription billing. The platform received the India Innovation Catalyst Award at #Biologics2025
- Yantra: a marketplace for lab instrument booking and sample testing in which an admin mediates between clients and labs, with permission-based access control, quotations, purchase orders, invoices, and Razorpay payments
- Internal HR management system: attendance, leave, payroll, KPI reviews, recruitment, and meeting-room booking modules on a 41-model Prisma schema
- Migrated the IndiaPharmaHub database from Sequelize to Prisma and PostgreSQL, and remapped existing S3 files, using a re-runnable migration script
- Reduced layout shift on the IndiaPharmaHub products page (CLS 0.112 to 0.006) and removed about 150 KB of unused JavaScript for buyers through code splitting
- Wrote a script that runs only the Jest tests affected by a code change, using the import dependency graph; the IndiaPharmaHub suite has 520+ test files
- Deploy and manage the applications on AWS EC2 and Bluehost VPS

Junior Full Stack Developer | Renewalytics Services Pvt. Ltd. March 2025 - March 2026

- Rebuilt the FNS forecasting and scheduling platform, which manages 3.22+ GW of renewable energy capacity across 34+ sites, and improved application performance by up to 80% with caching, memoization, and Context API changes
- Built ExcelFlow, a reporting application for 33 solar and wind plants, using BullMQ to process XLSB files of 15 MB or more with 16+ sheets in parallel, with automated email delivery of reports
- Wrote cron-based data pipelines that fetch data from FTP, SFTP, and client APIs and load it with bulk upserts, caching, and rate limiting, across 3 applications (Next.js, PostgreSQL, MySQL, MongoDB, Redis)
- Built RealSync user management with role-based access control, NextAuth.js and JWT authentication, and password reset

- Managed DigitalOcean servers with PM2 and Nginx, including database backups, MongoDB log rotation, cron jobs, and monitoring
- Migrated the servers to a new droplet after a production security incident and restored operations without data loss
- Worked directly with 10+ renewable energy clients to gather requirements

Full-Stack Developer Intern | ShypBUDDY Pvt. Ltd.

March 2024 - September 2024

- Built admin and user panels with Next.js, React, Tailwind CSS, Clerk, and PostgreSQL
- Integrated 7+ courier APIs (Delhivery, DTDC, Ekart, Shadowfax, Xpressbees, Amazon) and the Shopify API for order syncing
- Implemented order management, rate calculator, warehouse management, MIS reports, BUDDYSHIELD insurance, Cashfree KYC, and pincode serviceability

OPEN SOURCE

DevCompass | npm Package Maintainer

March 2026 - Present

Dependency health checker for JavaScript projects. 50 releases, 2,000+ downloads in the last month.

npmjs.com/package/devcompass

- Publish and maintain a CLI that scans npm dependencies for known vulnerabilities (OSV, NVD), outdated and unused packages, and license conflicts
- Added AI-based recommendations through four providers: OpenAI, Anthropic, Google, and local Ollama
- Built an interactive D3.js dependency graph with five layouts and search, filter, and zoom
- Built an auto-fix command with risk classification, dry-run preview, automatic backup, and undo
- Fixed a shell-injection issue (CWE-78) and a path-traversal issue, replaced unsalted SHA-256 with salted script for API key storage, and moved all command execution to execFile with argument arrays
- Set up GitHub Actions for tests with a 60% line-coverage minimum, npm audit, CodeQL, OpenSSF Scorecard, and a release version check
- Track 500+ popular npm packages for deprecation and security alerts through the GitHub Issues API, using concurrent requests (80% faster)

PROJECTS

Crime Predict

React.js, Python, Django, SQLite3, JWT, REST APIs

- Built a full-stack web application for crime data analysis for law enforcement in India, with JWT authentication, admin and user interfaces for managing crime data, data visualization, and a news feed

LinkedIn Clone

Next.js, Node.js, MongoDB, Tailwind CSS, NextAuth.js, REST APIs

- Built a professional networking application with Google OAuth, user profiles, a post feed with create, edit, and delete, and light and dark themes

EDUCATION

Master of Computer Application (MCA) | 2024

Hiray College (Bandra East), University of Mumbai

Bachelor of Computer Science (B.Sc. CS) | 2022

Patkar Varde College (Goregaon West), University of Mumbai

CERTIFICATIONS

Big Data Computing (NPTEL, 2021) | Data Analytics with Python (NPTEL, 2024) | Postman Student Expert (Postman, 2021)
